Eat Well. Every Single Day.

Your 7-Day Plan.

Seven days of real meals, none over fifteen minutes. You cook once a day — dinner. Every lunch is assembled cold

Your Week

	BREAKFAST	LUNCH	DINNER
01	Greek Yogurt with Berries & Seeds	Tuna & White Bean Salad	Garlic Prawns with Wilted Spinach
02	Cottage Cheese & Avocado Toast	Chicken, Avocado & Seed Box	Miso Butter Beans with Greens
03	Cottage Cheese with Berries & Flaxseed	Mediterranean Tuna Bowl	Sea Bass with Broccoli & Lemon
04	Greek Yogurt with Walnuts & Honey	Tuna, Bean & Rocket Box	Mushroom & Herb Omelette
05	Oat Porridge with Mixed Seeds	Chicken, Walnut & Kale Box	Chicken & Vegetable Stir-Fry
06	Savoury Scrambled Eggs with Spinach	Smoked Mackerel & Herb Plate	Beef & Broccoli with Sesame
07	Cinnamon Oats with Almond Butter	Turkey & Cucumber Roll-Ups	Egg & Broccoli Stir-Fry

OPTIMISATION WINDOW · DAYS 5-7

Garlic Prawns with Wilted Spinach

High-protein omega-3 plate — rapid cook protocol

 **10 min**
COOK TIME

 **38g**
PROTEIN

 **1**
SERVING

 **Medium**
GASTRIC LOAD

INGREDIENTS

- 250g raw king prawns, peeled and deveined
- 100g baby spinach
- 2 garlic cloves, minced
- ½ tsp chilli flakes
- 2 tbsp extra virgin olive oil
- Juice of ½ lemon
- Small handful flat-leaf parsley
- Sea salt & black pepper

Optimisation Window · Days 5-7

METHOD

- 01 Heat the pan**

Warm olive oil in a wide pan over medium-high heat. Add garlic and chilli flakes and cook 30 seconds until fragrant, not browned.
- 03 Wilt the spinach**

Add spinach to the pan in handfuls, tossing until just wilted — about 1 minute.
- 02 Cook the prawns**

Add prawns in a single layer. Cook 2 minutes each side until pink and just opaque. Do not overcook — prawns turn rubbery fast.
- 04 Finish and serve**

Squeeze over lemon, season, and scatter parsley. Serve immediately.

BIOLOGICAL SIGNAL

Prawns deliver one of the fastest-absorbing lean protein sources available — 38g with virtually no fat or carbohydrate to slow digestion. Garlic provides allicin with direct anti-inflammatory action. Spinach supplies iron, folate, and magnesium in a single rapid cook. Ready in under ten minutes with no compromise on protein quality.

PHASE 03 · DIVERSIFY & SUSTAIN

Miso Butter Beans with Greens

Anthocyanin + multi-strain probiotic — full gut protocol

 **12 min**
COOK TIME

 **18g**
PROTEIN

 **1**
SERVING

 **Medium**
GASTRIC LOAD

INGREDIENTS

- 1 × 400g tin butter beans, drained and rinsed
- 100g cavolo nero or kale, stems removed
- 1 tbsp white miso paste
- 1 tbsp warm water
- 1 tbsp extra virgin olive oil
- 1 garlic clove, minced
- Juice of ½ lemon
- Black pepper

Phase 03 · Diversify & Sustain

METHOD

- 01 Loosen the miso**

Whisk the miso paste with the warm water and lemon juice until smooth. Never add miso paste straight into a hot pan.
- 03 Wilt the greens**

Add the kale with a splash of water. Cover and cook 4 minutes until tender.
- 02 Soften the garlic**

Warm the olive oil in a wide pan over medium heat. Add the garlic and cook 1 minute until fragrant.
- 04 Finish off heat**

Add the beans and warm through 2 minutes. Take off the heat, then stir in the miso mixture. Season with pepper.

BIOLOGICAL SIGNAL

Butter beans are one of the highest-fibre legumes available — feeding Bifidobacterium and Akkermansia directly. Miso delivers live fermented cultures alongside prebiotic glutamates. Cavolo nero provides sulforaphane and glucosinolates supporting gut barrier integrity. Three layers of gut nutrition — prebiotics, probiotics, and postbiotics — in one twelve-minute bowl.

EVENING WINDOW · 5PM–9PM

Sea Bass with Broccoli & Lemon

Circadian metabolic alignment — overnight repair protocol

 **14 min**
COOK TIME

 **36g**
PROTEIN

 **1**
SERVING

 **Low**
GASTRIC LOAD

INGREDIENTS

- 180g sea bass fillet, skin-on
- 250g broccoli florets
- 1 tbsp unsalted butter
- 1 lemon, juiced
- 1 garlic clove, minced
- Sea salt flakes
- Black pepper

Evening Window · 5Pm–9Pm

METHOD

- 01 Heat the pan**
Warm the olive oil in a non-stick pan over medium-high heat until shimmering.

02 Crisp the skin
Season the fillets and lay them skin-side down. Press flat for 20 seconds. Cook 4 minutes without moving them until the skin releases cleanly.
- 03 Flip and finish**
Turn and cook 1–2 minutes more. The flesh should be opaque and flake easily.

04 Steam the broccoli
Steam the broccoli 4 minutes with the garlic until bright and just tender. Plate with the fish, lemon juice and parsley.

BIOLOGICAL SIGNAL

Magnesium in broccoli directly supports overnight insulin signalling — the mineral most critical for glucose clearance during sleep. Sea bass provides light, easily digestible protein that avoids the digestive burden that disrupts sleep quality. Designed for the evening metabolic reset window when insulin sensitivity is at its daily low — the wrong time for heavy carbohydrate loading.

FUEL

Mushroom & Herb Omelette

Stimulating Nerve Growth Factor for neuroplasticity

🕒 12 min
COOK TIME

🥛 22g
PROTEIN

👤 1
SERVINGS

🎯 NGF Stimulation
COGNITIVE TARGET

INGREDIENTS

- 3 large eggs
- 80g lion's mane mushroom, torn into pieces
- 1 tbsp unsalted butter
- Fresh thyme
- ½ tsp truffle oil (optional)
- Sea salt & cracked black pepper

Fuel

METHOD

- 01 Sear the mushroom**
Melt half the butter in a non-stick pan over medium-high heat. Add torn lion's mane pieces in a single layer.

02 Caramelise
Sauté undisturbed 4–5 minutes until deeply golden — this step is critical for hericenone bioavailability. Flip and cook 2 minutes more. Remove and set aside.
- 03 Cook the eggs**
Whisk eggs with salt and pepper. Melt remaining butter in the same pan over medium heat. Pour in eggs.

04 Fold and finish
As eggs set, place caramelised mushroom across one half. Fold the omelette over. Slide onto a plate. Finish with truffle oil and fresh thyme.

BIOLOGICAL SIGNAL

Lion's mane stimulates Nerve Growth Factor — the compound that promotes neuroplasticity and protects against cognitive decline. Sautéing until deeply golden is essential for maximum bioavailability of the active hericenone compounds, which are heat-activated. Eggs add choline and DHA for a complete cognitive-support breakfast.

SARCOPEMIA PREVENTION

Chicken & Vegetable Stir-Fry

A complete anti-sarcopenia plate — fast protein delivery

🕒 14 min
COOK TIME

🥄 42g
PROTEIN

👤 1
SERVINGS

🔄 Leucine + mTORC1
LONGEVITY TARGET

INGREDIENTS

- 200g chicken breast, thinly sliced
- 1 red pepper, sliced
- 100g broccoli florets
- 1 tbsp sesame oil
- 2 tbsp tamari
- 1 garlic clove, minced
- 1cm fresh ginger, grated
- Sesame seeds & spring onion, to finish

Sarcopenia Prevention

METHOD

- 01 Sear the chicken

Heat sesame oil in wok over high heat. Add chicken in single layer. Cook 3–4 min golden. Flip 2 min.
- 02 Stir-fry vegetables

Add garlic, ginger to wok. Stir 30 seconds. Add broccoli and pepper. Stir-fry 3 minutes.
- 03 Combine

Return chicken to wok. Add tamari. Toss everything together 1 minute until well coated.
- 04 Serve

Finish with sesame seeds and spring onion. Serve immediately.

BIOLOGICAL SIGNAL

Chicken breast provides leucine at the threshold required to activate mTORC1 — the cellular signalling pathway that initiates muscle protein synthesis. The most critical sarcopenia prevention meal in the week. Broccoli contributes sulforaphane supporting cellular repair. High protein, low gastric load, ready in fourteen minutes.

SEX HORMONES

Beef & Broccoli with Sesame

The most efficient sex hormone mineral delivery

 **12 min**
COOK TIME

 **34g**
PROTEIN

 **1**
SERVINGS

 **Highest Zinc Density**
HORMONAL TARGET

INGREDIENTS

- 200g beef sirloin or rump, thinly sliced
- 200g broccoli florets
- 2 tbsp tamari
- 1 tbsp sesame oil
- 1 garlic clove, minced
- 1cm fresh ginger, grated
- 1 tsp sesame seeds
- Spring onion, to finish

Sex Hormones

METHOD

- 01 Sear the beef**
Heat sesame oil in wok until smoking. Add beef — no movement 90 sec. Toss, cook 1 min. Remove.
- 02 Stir-fry broccoli**
Add garlic, ginger. Stir 20 sec. Add broccoli + 2 tbsp water. Cover and steam 3 minutes.
- 03 Combine**
Return beef to wok. Add tamari. Toss over high heat for 1 minute.
- 04 Finish and serve**
Scatter sesame seeds and spring onion. Serve immediately.

BIOLOGICAL SIGNAL

Beef delivers the highest bioavailable zinc of any land-animal protein — the rate-limiting mineral for testosterone synthesis in men and progesterone production in women. Broccoli contributes DIM (diindolylmethane), supporting oestrogen metabolism. Together, the most efficient hormonal mineral plate in the week — ready in twelve minutes.

REPAIR

Egg & Broccoli Stir-Fry

Sulforaphane and the brain's master antioxidant pathway

15 min
COOK TIME

20g
PROTEIN

1
SERVINGS

Nrf2 Activation
COGNITIVE TARGET

INGREDIENTS

- 3 large eggs
- 200g broccoli florets
- 1 tbsp sesame oil
- 1 tbsp oyster sauce
- 1 garlic clove, minced
- 1 spring onion, sliced
- Sesame seeds, to finish

Repair

METHOD

- 01 Blanch broccoli**
Blanch broccoli in boiling water 2 minutes. Drain well.

02 Stir-fry
Heat sesame oil in a wok over high heat. Add garlic, stir 30 seconds. Add broccoli, stir-fry 2 minutes.
- 03 Scramble the eggs**
Push broccoli to the side. Crack eggs into the cleared space. Scramble gently until just set.

04 Toss and finish
Toss everything together with oyster sauce. Finish with spring onion and sesame seeds.

BIOLOGICAL SIGNAL

Broccoli contains sulforaphane — a compound that crosses the blood-brain barrier and activates Nrf2, the master antioxidant pathway that directly protects neurons from oxidative damage. Lightly blanching before stir-frying preserves more sulforaphane than prolonged high-heat cooking alone.

COFFEE · ICED · OAT MILK

Banana Bread Latte

Slow-curve sweetness — pairs with Metabolic Health

5 min
PREP TIME

8g
PROTEIN

1
SERVING

Low
GLYCEMIC

INGREDIENTS

- 1 shot espresso, cooled
- 150ml oat milk
- ½ ripe banana, frozen
- ¼ tsp cinnamon
- 1 tsp almond butter
- Pinch of sea salt
- Ice

Coffee · Iced · Oat Milk

METHOD

- 01 Blend the base**
Blend the frozen banana, almond butter, cinnamon and salt with 50ml of the oat milk until completely smooth.

02 Build the glass
Fill a tall glass with ice and pour the banana base over.

03 Add the milk
Top with the remaining oat milk.
- 04 Layer the espresso**
Pour the espresso over the back of a spoon so it sits on top rather than sinking through.

05 Stir and serve
Stir through just before drinking — the layers are for looking at, not for tasting.

WHY IT WORKS

Caramelised banana carries the sweetness a syrup would normally have to — the frozen fruit does the work, with nothing added. Oat milk, cinnamon and the fat in the almond butter flatten the glucose curve behind it, so the sweetness arrives slowly instead of all at once. It drinks like dessert and behaves like breakfast.

TEA · ICED · METABOLIC

Iced Green Tea & Mint

Drink it with the meal, not after it — pairs with Metabolic Health

5 min
PREP TIME

0g
PROTEIN

1
SERVING

High
CATECHIN

INGREDIENTS

- 2 green tea bags (sencha)
- 300ml hot water (80°C)
- Large handful of fresh mint
- Squeeze of lemon
- Ice

Tea · Iced · Metabolic

METHOD

- 01 Steep short

Steep the green tea at 80°C for two minutes — no longer, or it turns bitter and undrinkable.
- 02 Infuse the mint

Add the mint and let it infuse as the tea cools naturally.

- 03 Chill through

Chill completely before it touches ice, or it will dilute.
- 04 Serve

Pour over a full glass of ice and finish with lemon.

WHY IT WORKS

Green tea catechins have modest but real evidence behind them for glucose handling, and the timing is what unlocks it: drink this alongside a carbohydrate-heavy meal, not an hour afterwards. The mint is there because green tea alone is a hard sell every day, and the drink you actually finish is the one that works.

TEA · ICED OR WARM · SLEEP

Chamomile & Cacao Evening Tea

Wind down without a sedative — pairs with Hormonal Health

6 min
PREP TIME

0g
PROTEIN

1
SERVING

High
MAGNESIUM

INGREDIENTS

- 1 chamomile tea bag
- 1 tsp dried lavender
- 200ml hot water
- 1 tsp raw cacao powder
- 1 tsp raw honey

Tea · Iced Or Warm · Sleep

METHOD

- 01 Steep long**
Steep the chamomile and lavender in hot water for a full 5 minutes, covered. Covering keeps the volatile oils in the cup rather than the air.

02 Make a cacao paste
Put the cacao in your mug with 2 tbsp of the hot tea and whisk smooth before adding the rest.
- 03 Combine**
Pour the remaining tea through a strainer into the mug, whisking as you go.

04 Sweeten last
Stir in honey. Drink about an hour before bed.

WHY IT WORKS

Chamomile contains apigenin, which binds to the same receptors targeted by mild sedatives — the effect is real but gentle, and it builds with regular use rather than hitting on the first cup. Raw cacao adds polyphenols with only trace caffeine, so it deepens the drink without costing you the sleep you are trying to protect.
